

INTERNATIONAL SEARCH REPORT

International application No.
PCT/AU2006/001059

A. CLASSIFICATION OF SUBJECT MATTER

Int. Cl.

A61K 31/728 (2006.01) A61P 1/00 (2006.01) A61P 35/00 (2006.01)

According to International Patent Classification (IPC) or to both national classification and IPC

B. FIELDS SEARCHED

Minimum documentation searched (classification system followed by classification symbols)

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched

Electronic data base consulted during the international search (name of data base and, where practicable, search terms used)
MEDLINE, CAPLUS, WIPDS; Hyaluronan, hyaluronic acid, hyaluronate, beta-glucuronidase, treatment, therapy,
A61K 31/728 (2006.01)

C. DOCUMENTS CONSIDERED TO BE RELEVANT

Category*	Citation of document, with indication, where appropriate, of the relevant passages	Relevant to claim No.
X	WO 2003/018062 A1 (MEDITECH RESEARCH LIMITED) 06 March 2003 See Examples 5, 6 and 7; page 16 lines 1-2; page 13 lines 4-12 and page 16 lines 12-17.	1-3, 11-14, 17, 20-28 35-38, 41, and 44-48
X	WO 2002/005852 A1 (MEDITECH RESEARCH LIMITED) 24 January 2002 See Example 3; description of figures; page 9 lines 30-34 and page 10 lines 30-37.	1-3, 11-14, 17, 20-28 35-38, 41, and 44-48
X	WO 2000/041730 A1 (MEDITECH RESEARCH LIMITED) 20 July 2000 see Summary of the Invention; Examples 2 and 10; page 17 line 37 and page 9 lines 30-34	1-3, 17, 20-28 41, and 44-48

☒ Further documents are listed in the continuation of Box C☒ See patent family annex

* Special categories of cited documents: document defining the general state of the art which is not considered to be of particular relevance	"T" later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention
"E" earlier application or patent but published on or after the international filing date	"X" document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone
"L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)	"Y" document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art
"O" document referring to an oral disclosure, use, exhibition or other means	"G" document member of the same patent family
"P" document published prior to the international filing date but later than the priority date claimed	

Date of the actual completion of the international search
22 August 2006

Date of mailing of the international search report

22 SEP 2006

Name and mailing address of the ISA/AU

AUSTRALIAN PATENT OFFICE
PO BOX 200, WODEN ACT 2606, AUSTRALIA

Box No. II Observations where certain claims were found unsearchable (Continuation of item 2 of first sheet)

This international search report has not been established in respect of certain claims under Article 17(2)(a) for the following reasons:

1. ☐ Claims Nos.:
because they relate to subject matter not required to be searched by this Authority, namely:

2. ☐ Claims Nos.:
because they relate to parts of the international application that do not comply with the prescribed requirements to such an extent that no meaningful international search can be carried out, specifically:

3. ☐ Claims Nos.:
because they are dependent claims and are not drafted in accordance with the second and third sentences of Rule 6.4(a)

Box No. III Observations where unity of invention is lacking (Continuation of item 3 of first sheet)

This International Searching Authority found multiple inventions in this international application, as follows:
See supplementary box

1. ☐ As all required additional search fees were timely paid by the applicant, this international search report covers all searchable claims.
2. ☐ As all searchable claims could be searched without effort justifying additional fees, this Authority did not invite payment of additional fees.
3. ☐ As only some of the required additional search fees were timely paid by the applicant, this international search report covers only those claims for which fees were paid, specifically claims Nos.:

4. ☒ No required additional search fees were timely paid by the applicant. Consequently, this international search report is restricted to the invention first mentioned in the claims; it is covered by claims Nos.:

1-48

Remark on Protest

- ☐ The additional search fees were accompanied by the applicant's protest and, where applicable, the payment of a protest fee.
- ☐ The additional search fees were accompanied by the applicant's protest but the applicable protest fee was not paid within the time limit specified in the invitation.
- ☐ No protest accompanied the payment of additional search fees.

Supplemental Box

(To be used when the space in any of Boxes I to VIII is not sufficient)

Continuation of Box No: III

This International Application does not comply with the requirements of unity of invention because it does not relate to one invention or to a group of inventions so linked as to form a single general inventive concept.

In assessing whether there is more than one invention claimed, I have given consideration to those features which can be considered to potentially distinguish the claimed combination of features from the prior art. Where different claims have different distinguishing features they define different inventions.

This International Searching Authority has found that there are different inventions as follows:

- 1) Claims 1-48 directed to formulations comprising hyaluronan (HA) and a therapeutic agent, or methods of treatment comprising administration of said formulation wherein said treatment modulates the activity of beta-glucuronidase.
- 2) Claims 49-53 directed to a pharmaceutical composition comprising a formulation comprising hyaluronan (HA) and a therapeutic agent, when used to treat cancer.
- 3) Claims 54-56 directed to a method of treatment comprising administration of a formulation comprising hyaluronan (HA) and a therapeutic agent, wherein said formulation or a component thereof modulates the activity of drug transport proteins.

PCT Rule 13.2, first sentence, states that unity of invention is only fulfilled when there is a technical relationship among the claimed inventions involving one or more of the same or corresponding special technical features. PCT Rule 13.2, second sentence, defines a special technical feature as a feature which makes a contribution over the prior art.

The only feature common to all of the claims is the formulation comprising hyaluronan (HA) and a therapeutic agent. However this concept is not novel in the light of:

WO 2002005852 A1 (MEDITECH RESEARCH LIMITED) 24 January 2002, which discloses compositions comprising hyaluronan and a chemotherapeutic agent.

This means that the common feature can not constitute a special technical feature within the meaning of PCT Rule 13.2, second sentence, since it makes no contribution over the prior art.

Because the common feature does not satisfy the requirement for being a special technical feature it follows that it cannot provide the necessary technical relationship between the identified inventions. Therefore the claims do not satisfy the requirement of unity of invention *a posteriori*.

INTERNATIONAL SEARCH REPORT

Information on patent family members

International application No.

PCT/AU2006/001059

This Annex lists the known "A" publication level patent family members relating to the patent documents cited in the above-mentioned international search report. The Australian Patent Office is in no way liable for these particulars which are merely given for the purpose of information.
